## rothkamm a bauhaus new york

NYC concert premiere on Wednesday, April 14th, 2004 at Bauhaus.

The originator of supermodernism and proponent of retro-computing, Rothkamm blends real-time computation, improvisation, relaxed composition, and modified cosmological calculations to create complex music for a specific space.

Using the FB01, K5M, and other 80's sound modules; programming in IFORM (a language with ties to the SETI project) Rothkamm will generate that new-new sound for our age of supermodernism.

Wednesday, April 14th, 2004 10 pm to midnight

Bauhaus 196 Orchard Street (at Houston) New York, NY 10002
